

Krista Foley

Staff CT Technologist Computed Tomography

- Years at Hoag: 16
- Pursuing a bachelor's degree in health information management
- Has taken on additional departmental responsibilities and learning opportunities
- Believes every position at a hospital is related to patient care and makes an impact

Dear Kingston Technology,

I would like to take this opportunity to express my appreciation for the Kingston Technology Scholarship, which I have been awarded. It is a great honor to accept such a generous gift and contribution which adds to my professional goals here at Hoag. Upon completion of my health information management bachelor's degree in December 2023, I will be pursuing experience in the medical coding field, specifically radiology. My one-to-three-year plan is to obtain a CIRCC (Certified Interventional Radiology and Cardiology Coder), COC (Certified Outpatient Coder) and CIC (Certified Inpatient Coder), as well as practical application to build upon the invaluable 16 years of experience here at Hoag in the imaging department. It's a pleasure to be a student in the Southern New Hampshire Global

Campus Program. I have worked diligently for straight A's since I began the program on May 2, 2022. Thank you again for the financial and moral support given with this scholarship.

Sincerely,
Krista M. Foley, RT (CT)
