## Respiratory Care Practitioner

- Years at Hoag: 6
- Pursuing a bachelor's degree in respiratory science
- Inspired by the dedication and compassion of his fellow employees
- Believes he owes it to patients to optimize their care by furthering his education

Dear Kingston Technology,

I would like to express my sincere appreciation for your assistance in furthering my professional career. I am ecstatic to have been chosen as a Hoag Classic Scholar and am inspired to continue pursuing my educational goals with passion and purpose.

I have been working as a respiratory therapist at Hoag Hospital for six years and recently have decided to pursue a Bachelor of Science in Respiratory Therapy. This degree will increase my knowledge within my field and will improve the care I provide to the patients and community in which I serve. Looking to the future, I plan to further my education with a Master of Science in Cardiovascular Perfusion. As a perfusionist, I will be able to assist cardiac surgeons in saving the lives of patients with cardiovascular disease.

This scholarship will provide me with financial comfort and will allow me to put more effort into my studies, as a financial weight has been lifted from my shoulders. The fact that a multinational corporation gives back to the community by helping students achieve their goals is truly inspiring. Thank you for helping me along my health care journey, allowing me to better myself and in turn provide better care to the patients I treat.

With gratitude,  
Zane Morris
